

Sleeper Air

PLATINUM

REST COMFORTABLY

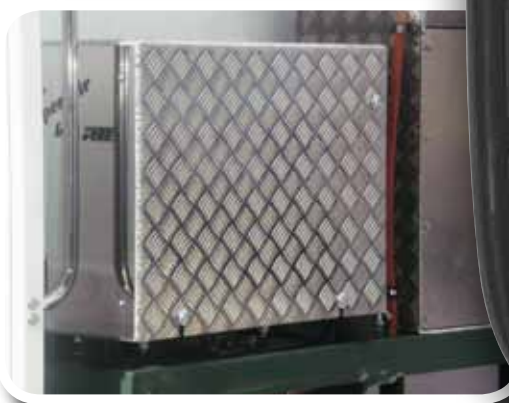

The most advanced truck Sleeper Cab Air Conditioning is here. With today's ever changing advances in technology brings an opportunity to advance how sleeper cab air conditioning is run and controlled. Whether its day or night the unit delivers a comfortable environment ensuring the driver has had the best possible chance to rest.

Manual Mode – One Touch Ignition Start, set the climate control and the unit does the rest; fan control fully automatic.

Automatic Mode – Continually monitors the truck batteries whilst parked; should the batteries fall below 12.5V the Kohler engine starts and charges the batteries maintaining peak performance.

Also utilising a digital switching system that uses the latest in electronic hardware with a custom keypad designed for ease of operation. The keypad allows the operator to choose between automatic or manual operation, with a host of function notices i.e.: services hours with service due.

- Sleeper Air units are suitable for all makes and models
- Various mounting options
- Low vibration and super quiet operation
- Simple to use and operate
- Full engine protection
- Battery maintenance
- Quick system check with self diagnostics
